**Record 1**

**JP2001301323 A**  
**RECORDING SHEET**  
**ASAHI GLASS CO LTD**  
**Inventor(s): TANUMA TOSHIHIRO**

**Application No. 2001071524 JP2001071524 JP, Filed 19940525, Published 20011031**

**Abstract:** PROBLEM TO BE SOLVED: To obtain a recording sheet excellent in the absorbing property of ink as well as the fixing property of a coloring matter and generating no color fading in a long period preservation after printing.

**SOLUTION:** The recording sheet is provided on a substrate with a porous ink receptor layer containing a quenching agent consisting of iodine or iodide and hindered amine while the porous ink receptor layer is characterized by the constitution thereof wherein inorganic grains are connected by a binder.

**Int'l Class:** B41M00500; B41J00201
